Alert Detail

Medium	Application Error Disclosure
Description	This page contains an error/warning message that may disclose sensitive information like the location of the file that produced the unhandled exception. This information can be used to launch further attacks against the web application. The alert could be a false positive if the error message is found inside a documentation page.

CWE Id	550
WASC Id	13
Plugin Id	90022

Medium	**Content Security Policy (CSP) Header Not Set**
Description	Content Security Policy (CSP) is an added layer of security that helps to detect and mitigate cer including Cross Site Scripting (XSS) and data injection attacks. These attacks are used for ever defacement or distribution of malware. CSP provides a set of standard HTTP headers that allow approved sources of content that browsers should be allowed to load on that page — covered ty HTML frames, fonts, images and embeddable objects such as Java applets, ActiveX, audio and

Solution	Modern Web browsers support the Content-Security-Policy and X-Frame-Options HTTP header on all web pages returned by your site/app. If you expect the page to be framed only by pages on your server (e.g. it's part of a FRAMESET SAMEORIGIN, otherwise if you never expect the page to be framed, you should use DENY. Alt implementing Content Security Policy's "frame-ancestors" directive.

Instances	1
Solution	Upgrade to the latest version of the affected library.
Reference	https://owasp.org/Top10/A06_2021-Vulnerable_and_Outdated_Components/
CWE Id	1395
WASC Id	
Plugin Id	10003

Low	**Application Error Disclosure**
Description	This page contains an error/warning message that may disclose sensitive information like the location of the file that produced the unhandled exception. This information can be used to launch further attacks against the web application. The alert could be a false positive if the error message is found inside a documentation page.

CWE Id	550
WASC Id	13
Plugin Id	90022

Low	**Cookie No HttpOnly Flag**
Description	A cookie has been set without the HttpOnly flag, which means that the cookie can be accessed by JavaScript. If a malicious script can be run on this page then the cookie will be accessible and can be transmitted to another site. If this is a session cookie then session hijacking may be possible.
URL	http://10.34.100.180

Method	GET
Attack	
Evidence	Set-Cookie: OJSSID
Other Info	
Instances	1
Solution	Ensure that the HttpOnly flag is set for all cookies.
Reference	https://owasp.org/www-community/HttpOnly
CWE Id	1004
WASC Id	13
Plugin Id	10010

Low	**Cookie without SameSite Attribute**
Description	A cookie has been set without the SameSite attribute, which means that the cookie can be sent as a result of a 'cross-site' request. The SameSite attribute is an effective counter measure to cross-site request forgery, cross-site script inclusion, and timing attacks.
URL	http://10.34.100.180
Method	GET
Attack	
Evidence	Set-Cookie: OJSSID
Other Info	
Instances	1
Solution	Ensure that the SameSite attribute is set to either 'lax' or ideally 'strict' for all cookies.
Reference	https://datatracker.ietf.org/doc/html/draft-ietf-httpbis-cookie-same-site
CWE Id	1275
WASC Id	13
Plugin Id	10054

Low	**Server Leaks Version Information via "Server" HTTP Response Header Field**
Description	The web/application server is leaking version information via the "Server" HTTP response head information may facilitate attackers identifying other vulnerabilities your web/application server i

Instances	612
Solution	Ensure that your web server, application server, load balancer, etc. is configured to suppress th generic details.
Reference	https://httpd.apache.org/docs/current/mod/core.html#servertokens https://learn.microsoft.com/en-us/previous-versions/msp-n-p/ff648552(v=pandp.10) https://www.troyhunt.com/shhh-dont-let-your-response-headers/

CWE Id	497
WASC Id	13
Plugin Id	10036

Low	**X-Content-Type-Options Header Missing**
Description	The Anti-MIME-Sniffing header X-Content-Type-Options was not set to 'nosniff'. This allows old Explorer and Chrome to perform MIME-sniffing on the response body, potentially causing the re interpreted and displayed as a content type other than the declared content type. Current (early Firefox will use the declared content type (if one is set), rather than performing MIME-sniffing.

Informational	**Authentication Request Identified**

Description	The given request has been identified as an authentication request. The 'Other Info' field contains a set of key=value lines which identify any relevant fields. If the request is in a context which has an Authentication Method set to "Auto-Detect" then this rule will change the authentication to match the request identified.

Informational	GET for POST
Description	A request that was originally observed as a POST was also accepted as a GET. This issue does not represent a security weakness unto itself, however, it may facilitate simplification of other attacks. For example if the original POST is subject to Cross-Site Scripting (XSS), then this findi may indicate that a simplified (GET based) XSS may also be possible.
